PROFESSIONAL SUMMARY

Entry-level cybersecurity professional with hands-on experience in Vulnerability Assessment and Penetration Testing of web applications, Api, networks and mobile application. Skilled in security testing using Burp Suite, Nmap, Metasploit, Nessus, with practical knowledge of identifying, validating and documenting security vulnerabilities. Seeking a VAPT/Penetration Tester role where I can apply my offensive security skills, strengthen my testing expertise and contribute to identifying and remediating security weaknesses.

EDUCATION

Geethanjali Institute of Science and Technology

B.Tech in ECE, Aggregate: 68.3%

November 2021-April 2025

Andhra Pradesh, India

G.V.R.R Junior College

Intermediate, Aggregate: 51.2%

June 2019-September 2021

Andhra Pradesh, India

SKILL SUMMARY

- **Security Tools** : BurpSuite, Nmap, Nessus, Metasploit, SQLmap, Postman, MobSF, Jadx, Frida, WireShark.
- **Operating Systems** : Windows, Kali Linux, Parrot OS.
- **Web Technologies** : Java Script, Html, CSS.
- **Security Reporting** : Vulnerability Reporting, Technical Documentation, Security Finding Communication.
- **Security Assessment** : Vulnerability Assessment, Network Pentesting, Web Application Pentesting, API Pentesting, Mobile Pentesting.

WORK EXPERIENCE

CYBERSECURITY ANALYST INTERN

May 2025-July 2025

Texial Innovations Pvt Ltd.

- Conducted vulnerability assessments and penetration testing on web applications and networks using Nmap, Burp Suite, and Metasploit to identify and validate security weaknesses.
- Performed reconnaissance, port/service enumeration and vulnerability identification during security assessments.
- Documented security findings with impact, risk and remediation recommendations, following OWASP Top 10 guidelines.

VAPT INTERN

Oct 2025-April 2026

CyberXchange Pvt Ltd.

- Performed Web Application Vulnerability Assessment and Penetration Testing on lab and simulated real-world targets, Identified and validated vulnerabilities including Broken Access Control, SQL Injection, Cross-Site Scripting (XSS) and authentication/authorization weaknesses.
- Conducted network reconnaissance and service enumeration using Nmap and performed security testing using Burp Suite and Metasploit, Prepared vulnerability assessment reports documenting vulnerability details, risk, impact and remediation recommendations.

PROJECTS

Metasploit2-Infra Pentesting | [LINK](#)

May 2025-July 2025

- Performed hands-on exploitation of known vulnerabilities in the Metasploit2 virtual machine to gain root access. Conducted network reconnaissance using Nmap to identify live hosts, open ports and running services.
- Performed vulnerability scanning to identify exploitable services and exploited the VSFTPD backdoor vulnerability to gain remote access. Used Meterpreter for post-exploitation activities including privilege escalation and system enumeration.

Optimization of Patch Antenna Performance MI Techniques | [LINK](#)

January 2025-April 2025

- Optimized patch antenna gain and bandwidth using machine learning based predictive parameter tuning, Applied regression and optimization algorithms to fine tune antenna design parameters achieving measurable performance improvements in return loss and efficiency.
- Conducted comparative analysis between traditional tuning methods and Machine Learning based tuning to evaluate improvement percentage, Prepared technical documentation and visualized simulation results for clear presentation during project review.
- Collaborated with team members to integrate data preprocessing, model training and performance evaluation in the workflow.

CERTIFICATES
